

Can you answer
yes
to any of these
questions?

- Do you suffer from neck and/or back pain?
- Have you had previous injuries to your neck and/ or back?
- Do you suffer the aches and pains in your neck and/or back due to the aging process?
- Do you have strain and/or pain after exercise or a day at work?
- Is it difficult for you to rotate your head to look left and right?
- Do you sit at a desk for extended periods of time?
- Do you find it difficult to lay in a comfortable position on your bed?
- Are you unable to sleep comfortably while laying on your stomach?
- Would you like to experience the comfort of a massage table in the privacy of your own home?
- Would you like to experience relaxation for your sore, tired muscles?

If you answered **yes** to any of the questions listed above, you may want to discuss TheraPosition™ with your healthcare professional so that he or she may prescribe this revolutionary new product to promote your comfort and relaxation.

This brochure is for informational purposes only. Present this brochure to your healthcare professional so that he or she may make a proper diagnosis and discuss the benefits TheraPosition™ can offer you.

Got Neck or Back Pain?

THERAPOSITION™
COMFORT SYSTEM

Do you suffer from acute or chronic neck or back pain? TheraPosition™ can ease your discomfort while relaxing in bed.

Have you been diagnosed with spinal problems such as a herniated disc or spinal compression? Are you recovering from surgery or an injury? Are you sore after a days work or exercise or suffering from the aches and pains of the aging process? TheraPosition™ is for you!

Simply laying on TheraPosition™ will relieve the pressure and pain by properly positioning your body in the comfort of your own bed. You will be able to relax, relieve pain and feel rejuvenated after daily use.

Testimonials

Here's what healthcare professionals are saying about pain relief with TheraPosition™

"Theraposition™ will enable the patient to lie face up or down as they would on a therapy table keeping the cervical spine in a relaxed neutral position while they follow their at home therapy instructions. This in turn will allow the muscles of the spine to relax making the therapy more effective. The patient could even sleep in the prone position using the Theraposition™ Comfort System without any undue stress on the cervical spine."
- **Howard A. Fidler, DC, FICC, FICPA**

"I've treated thousands of people with neck and back pain. One of the most important things our patients can do is be mindful of their posture to keep the spine and supportive muscles in proper alignment. Theraposition™ is an innovative new product which allows neutral position for our patients while they lie in bed. It is the only product which optimizes proper positioning in the face down or prone position, and is easy to use." - **Kevin Rausch, MPT**

As a physician and a patient who has had two operations for cervical spine disease, I find Theraposition™ wonderful. It allows me to lay on my back or stomach with my head and neck in a neutral, relaxed and natural position. This adds a nice alternative to lying on my side. When I feel tension or pain, I make sure to use Theraposition™ to get relief. - **E.S., M.D.**
